

From environmental concerns to tangible action

TNT's CO₂ Services help customers to pro-actively address the environmental impact of their business. These services equip customers with knowledge and allow them to take action.

CO₂ Report

Customers can choose the detail and frequency of reports, from a single page summary to a detailed data extract. The TNT CO₂ report helps customers to identify ways to reduce CO₂ and meet the compliance needs of their business.

For more information, please send an e-mail to: CO2Services@tnt.com.

Additional information:

CO₂ Neutral

Customers can ship their goods in a way that fully offsets any CO₂ emissions. TNT calculates the emissions produced by their shipments and compensates with CO₂ credits. TNT exclusively uses the highest quality 'gold standards' credits. Customers receive a yearly certificate specifying the amount of CO₂ that TNT neutralised on their behalf, and they can use the TNT CO₂ Neutral logo to show their commitment.

TNT is offering CO₂ Neutral transportation for all domestic express consignments in Germany at no additional charge, to help businesses mitigate their environmental impact.

CO₂ and global supply chains

For customers with global supply chains, TNT offers a range of additional services; CO₂ Quote to predict emissions of customers' future business and CO₂ Scenario to optimise CO₂ around alternative supply chain models.
